Our Service Offerings

RESOURCING SERVICES

ON-DEMAND RESOURCING
Resourcing based on project needs and requirements

MANAGED SERVICES

SOLUTIONS IMPLEMENTATION
Develop, maintain and support packaged/custom-built solutions

INFRASTRUCTURE MANAGEMENT
Monitor and manage IT infrastructure, and provide multi-tier support

FACILITIES & INFRASTRUCTURE
Providing facilities and infrastructure for offshore and/or service delivery resources

MANAGED CAPACITY
Complete team/project resourcing with capacity managed based on agreed SLAs

Our Service Delivery Models

Optimum offers three service delivery models, which client can choose from depending on the level of control/oversight that the clients would like. This typically depends on the nature of the engagement, lifecycle of the application and clients goals.
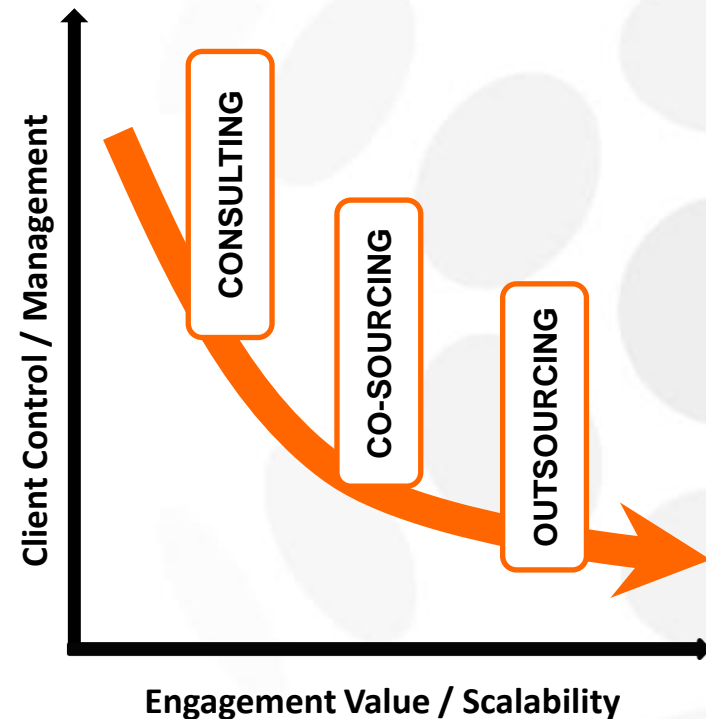

CONSULTING	Client controls the project while engaging Optimum consultants for specific services exclusively or among multiple vendor partners, each meeting their specific project requirements
CO-SOURCING	Client and Optimum both have acute insight on the engagement. Client is responsible for engagement planning and user coordination, while the Optimum team is responsible for deliverables and resource planning
OUTSOURCING	Optimum is given the control as the outsourced vendor partner. Engagement is usually managed through a set of service level agreements (SLAs).

Client Control / Management

CONSULTING

CO-SOURCING

OUTSOURCING
